

ZINN **Gispen**

SENSIBLE SEATING

We sit all day, without being aware of it. At breakfast, on our way to the office, at our desk, the dinner table... And in the evening, when we are tired of sitting all day, we sit down again to watch tv.

Sitting too much can cause pain, strained muscles, worn out spinal discs and fatigue. You don't notice it until it is too late. Should we stand all day then? No, standing too much is no good either. Variation is the answer. And making sure that when we sit, we sit the right way.

SIT RIGHT WITH **GISPEN**

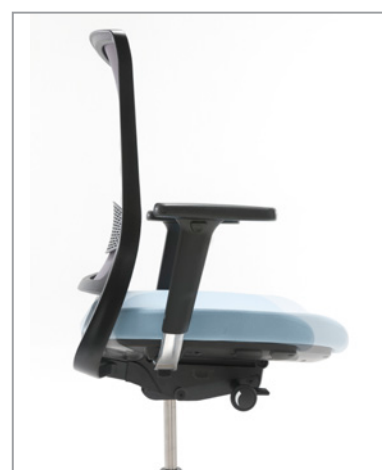

ZINN ENCOURAGES MOVEMENT

Direct comfort, optimal support and flexible elegance.

- Suitable for 98% of all people
- Dynamic synchronous mechanism with active tilting mechanism
- Body weight adaptation with Quick Adjustment
- Height adjustment with two phased hydraulic lift
- Seat depth adjustment of 10 cm with the seat sliding under the backrest (no uncomfortable gap between the seat and backrest)
- 3- or 4-dimensional armrests
- Flexible backrest for optimal pressure distribution
- Lumbar support adjustable in height for optimal support
- Meets NPR 1813 and NEN EN 1335 standard

SITTING RIGHT

ZINN BRINGS PEOPLE IN MOTION

The technology of the Dynamic Synchro mechanism stimulates sitting in a natural and dynamic way. It follows the changing posture of the body and offers support in every position.

ZINN OFFERS DIRECT COMFORT

- Well thought-out relation between seat and backrest
- Flexible backrest which moves along with the user's position

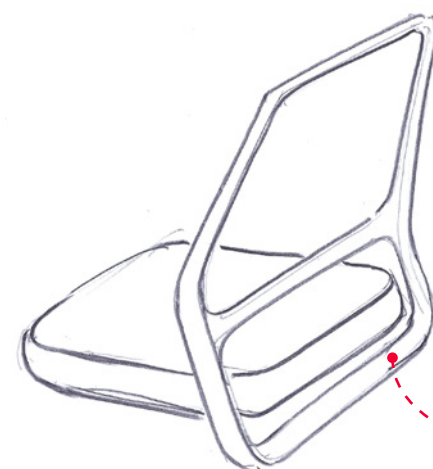

DESIGNER JUSTUS KOLBERG

"Design is balance in relation to the human form"

In his early twenties, Justus Kolberg made his entrance into the world of industrial design. Where he, as a designer, saw the possibilities for optimal use of his creativity and technical expertise. His preference quickly leaned towards chairs. Not only because chairs are very personal, but also because there is an endless variety in possible shapes.

He enjoys designing products which are in balance with the human form and are able to provoke emotion. To Kolberg, his biggest challenge was the backrest. A symbol for an elegant, friendly and businesslike office chair which offers comfort, user-friendliness and flexibility.

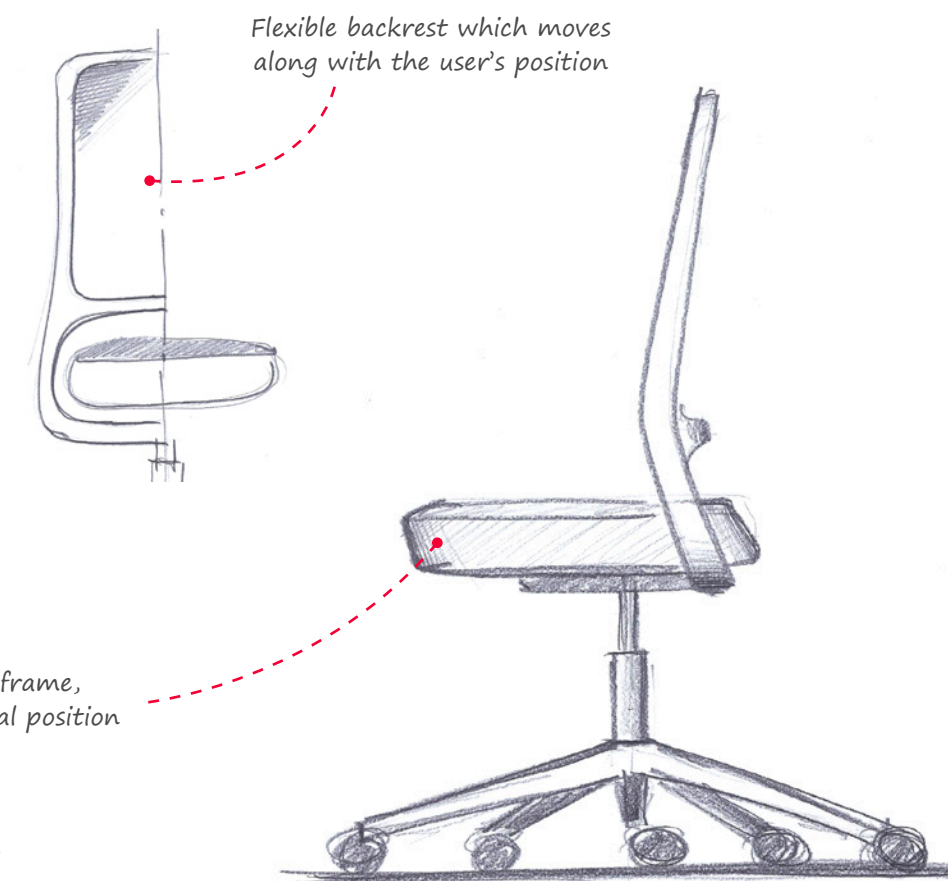

Zinn fits Gispén well. Its technique is neatly integrated and therefore hidden to the eye.

ZINN, IN BALANCE
WITH THE HUMAN FORM

*The seat slides through the backframe,
which prevents a big gap in the final position*

The elegant lines give character to the design

ZINN THE COLLECTION

Zinn office chair is available in two versions. A NEN EN 1335 version and an NPR version.
Both versions have the option of a black plastic or polished finish.

ZINN THE FABRICS

Next to its businesslike and reticent use of color, Zinn becomes eye-catching by using more daring combinations from its wide range of fabrics and colors. Diversify endlessly with 8 netweave colors for the backrest and over 70 colors in fabric for the seat and back. When combined with a black or polished aluminium star base hub, Zinn’s extensive assortment makes it one of the most colorful office chairs of its kind.

YOU'LL SIT RIGHT WITH **GISPEN**

ZINN CORPORATE SOCIAL RESPONSIBILITY

Zinn is a sustainable product and fits in every interior where human well-being comes first. The design aims to support this philosophy and to minimize environmental strain at the same time. Taking 'People, Planet and Profit' as a starting point, Zinn is built up from recyclable materials, using energy-efficient processes in its production. Extra attention has been paid to feeling, emotion and interaction. The result is a high-grade and custom made product for a personal interior.
