STORAGE

Remarkable sliding door cabinet

The SDK sliding door cabinet is ideal for functional storage and archiving in open spaces, adding character to the room at the same time. The cabinet opens and closes without making a single sound, keeping interference to a minimum.

SDK adds a decorative touch to any room due to its friendly-looking perforation patterns and the light or dark acoustic material on the back. The cabinet can also function as an office dividing wall or pinboard; the optional planters or acoustic PET felt panels are easily added. SDK is all about circularity and sustainability. The cabinet has a modular structure, can be used for many different functions and will last for years because of its timeless design.

SDK **THE SILENT**
ACOUSTIC SLIDING DOOR CABINET

Gispen

SDK in short

- Opt for smooth or perforated doors (round or square pattern)
- Lock on the front door
- Master key can be ordered separately
- The cabinets can be adjusted from the inside
- Sleek, robust and silent sliding doors
- Cabinet can be fully opened, shelf behind the door freely accessible
- Sleek architectonic design due to the top being given the same powder-coated finish
- Perforation with acoustic padding is optional, tested in compliance with ISO 354

The basis

SDK comes in many different sizes, ensuring that the cabinet will always match the rest of your furniture:

- The cabinets consist of two separate frames, which will be fitted together to form one unit prior to delivery
- Widths: 160, 180, 200 and 240 cm
- Heights: 74, 118, 160 and 195 cm

SDK FUNCTIONAL AND CHARACTERISTIC STORAGE

Royal Dutch Gazelle

SDK PET felt panels

Would you like to improve the acoustics and ambience of your interior? Then you might consider fitting a PET felt panel to the back of your SDK cabinet. Added benefit: the panels can also be used as pinboards. The panels are fitted via magnetic strips to allow for easy removal and are available in a wide range of colours.

SDK plant troughs

Would you like to add some green to the office? Stainless powder-coated planters are easily fitted on top of the cabinets. The troughs also function as a visual partition of the office. Good news: it has been proven that green in the work environment adds to the well-being of employees. The planters come in different dimensions.

Dimensions (LxWxH)

80x42x20 cm
90x42x20 cm
100x42x20 cm
120x42x20 cm

SUSTAINABILITY AND CIRCULAR ECONOMY

Gispen produces its furniture – SDK including – according to the latest insights into sustainability and the principles of the Circular Economy. This circular framework has served as our starting point.

★★★☆☆

VERY GOOD

MANUFACTURING PROCESS
The closed loop prevents waste production during the manufacturing process. The energy supplied during this process comes from a renewable source.

(REVERSED) LOGISTICS
Our transportation methods are optimised, we work closely together with our suppliers, use either acquired or mined local resources and manufacture/refurbish and recycle our products locally. This all results in a minimum strain on the environment.

MAINTENANCE AND UPGRADES
We extend the life of products by means of (un)planned regular maintenance but also take care of value retention by adding or removing components to improve a product's functionality or design.

LOGISTICS
During the design process we already take a product's packaging into consideration to reduce its volume, weight and waste. This method is good for the environment and reduces transportation damages.

(DIS)ASSEMBLY
Ease of disassembly is taken into account during the design of complex products and interchangeable modules, parts and components. This way, the materials are used efficiently and retain their value.

REUSE
Products, parts or components that have come to the end of their lifecycles are given a new purpose. Products do need to meet certain design requirements to be viable for reuse.

MATERIALS
We strive to prevent waste production. We select our materials upon their suitability for reuse and level of energy consumption. We also use renewable resources and non-toxic substances.

SDK accessories

Organised storage is made even easier with the many accessories that SDK has to offer:

- Shelves
- Pull-out frames
- Pull-out drawer
- Leaflet shelf
- Anti-tilt mechanism
- Bookend
- Cover instead of steel top

SDK Dimensions

Height: 74, 118, 160 or195 cm
Width: 160, 180, 200 or 240 cm
Depth: 48 cm

Details

Lock on the front door.
Master key can be ordered separately
Adjustable from the inside.

Leaflet shelf

Pull-out frame

Shelves

Round or square perforation

SDK perforation

As standard, the sliding doors come with round perforation and matching fabric. Smooth or square perforated doors are optional. One can also opt for acoustic foam instead of fabric for even better acoustics.
